EXPERIENCE

Software Engineer | Guitar Center – Lessons Team

July 2022 – June 2026

- Delivered customer-facing features across Guitar Center's ecommerce and lesson booking platforms using React, Next.js, and TypeScript, improving performance and user experience.
- Built reusable state management and component architectures that improved maintainability across complex booking and scheduling workflows.
- Integrated enterprise services across Salesforce, POS, and internal scheduling systems while implementing resilient error handling and asynchronous processing patterns.
- Owned end to end refactoring of legacy React codebase decomposing tightly coupled components into a reusable, design system improving cross team consistency.
- Developed complex lesson scheduling workflows supporting instructor availability, lesson durations, pricing logic, and customer onboarding across Guitar Center's lesson booking platform.
- Built scalable search and filtering experiences leveraging ElasticSearch/OpenSearch, enabling customers to discover instructors based on instrument type, location, lesson format, and availability.
- Partnered with product, design, and business stakeholders to scope and deliver improvements to the customer lesson booking workflow, driving a smoother checkout experience.

PROJECTS

WATCHLISTED | Full Stack AI – Powered Movie Discovery Platform

<https://watchlisted.vercel.app/>

- Architected and shipped a production grade full-stack movie discovery platform using Next.js, TypeScript, and modern React patterns with server/client component separation for optimized rendering and performance.
- Designed an intelligent search experience supporting both traditional keyword search and AI-powered natural language movie discovery, reducing unnecessary API calls through optimized query handling.
- Integrated the Anthropic Claude API to power personalized recommendations, conversational movie guidance, and AI-generated summaries based on user preferences.
- Built secure authenticated user experiences with protected routes and full CRUD functionality for personalized watchlists, saved content, and account-based interactions.

EDUCATION

California State University Northridge - Bachelor of Science, Computer Science

SKILLS

Languages: JavaScript, TypeScript **Frontend:** React, Next.js, HTML, CSS, Tailwind

Backend: Node.js, REST APIs, Salesforce,

Tools: AWS, Git, GitHub Actions
